

Features:

- Touchless dimmable controlled by motion sensor
- Surface installed
- Plug-and-play for easy installation
- Uniform light distribution with no dark spots
- Built with solid state connections to eliminate the risk of oxidation over time and extend the life of the product
- Designed to meet North American woodworking standards
- Made of ALCOA 6063-T5 aluminum that increases heat dissipation
- Suitable for dry indoor locations only
- CCT: 3000K (Warm White), 4000K (Natural White) or 6000K (Daylight)
- Working Voltage – 24Vdc.
- Power 7.2W / ft

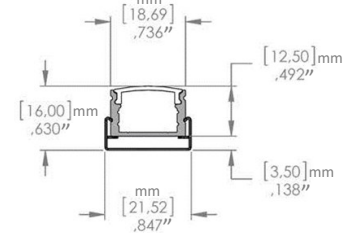

Modules available in various lengths:
